SUMMARY

Lead Software Engineer with 5+ years of experience in designing and delivering scalable cloud systems and enterprise-grade marketplaces using **AWS, Node.js, MySQL and Python**. Proven leader of cross-functional teams (50+ engineers), with measurable impact on uptime, latency, and operational efficiency.

PROFESSIONAL EXPERIENCE

iProgrammer Solutions Pvt. Ltd., Pune, Maharashtra, India: Lead Software Engineer Jan 2025 – Present

- Integrated GenAI components for natural-language query understanding and content recommendations, improving engagement and click-through rates by **30%**.
- Architected a **Marketplace** On-boarding system and profile verification platform for a large-scale enterprise.
- Led 50+ engineers** across 3 product lines; implemented agile workflows improving delivery efficiency by **35%**.
- Optimized **AWS serverless infrastructure**, reducing latency by **30%** and improving scalability.
- Collaborated with product owners to deliver impact-driven solutions across distributed systems.

iProgrammer Solutions Pvt. Ltd., Pune, Maharashtra, India: Senior Software Engineer Feb 2023 – Jan 2025

- Led backend development for 10+ **Enterprise Level Application**, achieving **99.9% uptime** and 100,000+ monthly user requests.
- Integrated multiple **payment models** to streamline transactions and improve marketplace experience.
- Reduced technical debt by 40% via strategic refactoring and modular system design.
- Architected a marketplace for architects and contractors, boosting platform engagement by **60%**.

iProgrammer Solutions Pvt. Ltd., Pune, Maharashtra, India: Software Engineer Mar 2022 – Feb 2023

- Developed full-stack onboarding systems using **React.js and Node.js**.
- Streamlined **CI/CD deployments** through AWS CodePipeline, reducing release time by **25%**.
- Improved system stability by resolving performance bottlenecks and enhancing test coverage.

iProgrammer Solutions Pvt. Ltd., Pune, Maharashtra, India: Associate Software Engineer Feb 2021 – Mar 2022

- Transitioned from frontend to full-stack engineering; implemented **Node.js + MySQL APIs**.
- Developed automation scripts and data visualization tools using **Python**.
- Gained expertise in AWS cloud deployment and production monitoring.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Python

Frameworks & Runtimes: NestJs, Node.js, NextJs, Express.js, React.js, fastAPI

Cloud & DevOps: AWS (Lambda, S3, Aurora, API Gateway, CodePipeline, EC2), GCP, OCI, Docker, CI/CD

Databases: MySQL, Postgresql, MongoDB, DocumentDB

Tools: Git, VS Code, Jira, Postman, Serverless Framework

EDUCATION

Bachelor of Computer Applications (BCA) Graduating Sept 2020
MIT World Peace University, Pune, India 7.4 CGPA

HSC (Computer and Mathematics) Graduating May 2017
The Aditya Birla Public School, Awarpur, MH, India 65 %

KEY PROJECTS

End-to-end Home-builder Platform Feb 2021 – Present
Backend Dev & Solution Architect – AWS Serverless, Aurora, Node.js

- Architected backend services for two mobile apps (IHB & Partner), achieving **99.9% uptime**.
- Designed and implemented an Admin Portal to manage configurations; reducing admin overhead by **40%**.
- Implemented resilient serverless patterns and caching strategies, cutting average API latency by **30%** for key endpoints.

Contact Center Panel (Customer Support Toolkit)

2022 – 2023

Full Stack & Solution Architect – AWS Serverless, React, Node.js

- Designed and delivered a contact center panel enabling agents to manage customer calls and tickets more efficiently.
- Improved agent throughput by **40%** and reduced average handling time by **25%**.
- Integrated call metadata with task workflows to automate follow-ups and reduce manual handoffs.
- Integrated **Knowlarity** services for call management

OneTech Lite (Offline-first Mobile Solution)

2022 – Present

Backend Dev & Sync Architect – Flutter (offline), AWS

- Implemented an offline-capable mobile app with automatic sync to cloud services; improved usability in low-connectivity regions.
- Designed robust sync conflict resolution and background sync to preserve data integrity

Event Management System (Enterprise Feature)

2021 – 2022

Full Stack – React, Node.js, MongoDB

- Built an end-to-end event management module, improving operational efficiency for clients.
- Implemented reusable UI components and backend streaming events which reduced frontend dev time by **25%**.

e-Invoicing SaaS (UAE) – PEPPOL / FTA Integration

2025 – Present

Solution Architect – PEPPOL, Node.js, Python, AWS

- Architected and delivered a PEPPOL-compliant SaaS platform for digital invoice exchange integrated with FTA.
- Automated invoice validation, transmission, and error handling, reducing manual processing by **100%**.
- Implemented secure data exchange and logging to satisfy compliance and audit requirements with **multi-tenant database structure**.

Designed Multi-CRM Platform for Marketplace & Home Services

2021 – Present

Solution Architect & Lead Engineer – Node.js, AWS, Microservices, Payments

- Architected and built a **suite of interconnected CRM systems** to support an enterprise marketplace and home services ecosystem at scale.
- Designed a **Partner Onboarding CRM** enabling vendors to operate across **multiple geographies**, manage product catalogs, dynamic pricing, and securely onboard bank details for automated payouts.
- Implemented **order and service lifecycle management CRM** to handle order creation, SLA tracking, agent assignments, delivery milestones, and customer interaction workflows.
- Built a **service fulfillment CRM** to manage end-to-end execution of home-building services including **2D/3D designs, consultations, and specialty services**.
- Integrated **payment gateways and settlement workflows** with role-based access control to ensure secure fund flows between customers, partners, and internal teams.
- Developed admin dashboards and reporting pipelines providing visibility into **partner performance, SLA compliance, revenue, and fulfillment metrics**.

LEADERSHIP & RECOGNITION

Team Leadership:

Managed 50+ developers across multiple product lines; set architecture standards and code review practices.

Awards:

Employee of the Year – iProgrammer Solutions Pvt. Ltd.

Knowledge Sharing:

Delivered internal workshops on **AWS Serverless design** and scalable microservices patterns.
