SUMMARY

Lead Software Engineer with 5+ years of experience in designing and delivering scalable cloud systems and enterprise-grade marketplaces using **AWS, Node.js, MySQL and Python**. Proven leader of cross-functional teams (50+ engineers), with measurable impact on uptime, latency, and operational efficiency.

PROFESSIONAL EXPERIENCE

iProgrammer Solutions Pvt. Ltd., Pune, Maharashtra, India: Lead Software Engineer Jan 2025 – Present

- Designed and deployed an AI-driven hyper-personalization engine using **TensorFlow** and Generative AI models to deliver service and product recommendations tailored to user behaviour, geolocation, and partner relationships.
- Led the data preparation pipeline, aggregating multi-source datasets (user interactions, geographic data, and feedback) and performing feature engineering to improve model accuracy.
- Implemented model training, evaluation, and fine-tuning workflows for deep learning recommendation models using TensorFlow and AWS SageMaker.
- Integrated GenAI components for natural-language query understanding and content recommendations, improving engagement and click-through rates by **30%**.
- Architected a **marketplace** onboarding system and profile verification platform for a large-scale enterprise.
- Led 50+ engineers** across 3 product lines; implemented agile workflows improving delivery efficiency by **35%**.
- Optimized **AWS serverless infrastructure**, reducing latency by **30%** and improving scalability.
- Collaborated with product owners to deliver impact-driven solutions across distributed systems.

iProgrammer Solutions Pvt. Ltd., Pune, Maharashtra, India: Senior Software Engineer Feb 2023 – Jan 2025

- Led backend development for Ultratech's UTEC platform, achieving **99.9% uptime** and 100,000+ monthly user requests.
- Integrated multiple **payment models** to streamline transactions and improve marketplace experience.
- Reduced technical debt by 40% via strategic refactoring and modular system design.
- Architected a marketplace for architects and contractors, boosting platform engagement by **60%**.

iProgrammer Solutions Pvt. Ltd., Pune, Maharashtra, India: Software Engineer Feb 2022 – Feb 2023

- Developed full-stack onboarding systems using **React.js and Node.js**.
- Streamlined **CI/CD deployments** through AWS CodePipeline, reducing release time by **25%**.
- Improved system stability by resolving performance bottlenecks and enhancing test coverage.

iProgrammer Solutions Pvt. Ltd., Pune, Maharashtra, India: Associate Software Engineer Feb 2021 – Mar 2022

- Transitioned from frontend to full-stack engineering; implemented **Node.js + MySQL APIs**.
- Developed automation scripts and data visualization tools using **Python**.
- Built an intelligent recommendation system improving user personalization.
- Gained expertise in AWS cloud deployment and production monitoring.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python

Frameworks & Runtimes: NestJs, Node.js, Express.js, React.js, Django, Gin, Microservices

Cloud & DevOps: AWS (Lambda, S3, Aurora, API Gateway, CodePipeline, EC2), GCP, OCI, Docker, CI/CD

Databases: MySQL, Postgresql, MongoDB, DocumentDB

Tools: Git, VS Code, Jira, Postman, Serverless Framework

EDUCATION

Bachelor of Computer Applications (BCA)

MIT World Peace University, Pune, India

Graduating Sept 2020

7.4 CGPA

CERTIFICATIONS

Programming for Everybody (Python) – Coursera
University of Michigan | Verified Certificate

Issued 2020

KEY PROJECTS

UTEC by Ultratech (End-to-end Home-builder Platform)

Feb 2021 – Present

Backend Dev & Solution Architect – AWS Serverless, Aurora, Node.js

- Architected backend services for two mobile apps (IHB & Partner), achieving **99.9% uptime**.
- Designed and implemented an Admin Portal to manage configurations; reducing admin overhead by **40%**.
- Implemented resilient serverless patterns and caching strategies, cutting average API latency by **40%** for key endpoints.

Contact Center Panel (Customer Support Toolkit)

2022 – 2023

Full Stack & Solution Architect – AWS Serverless, React, Node.js

- Designed and delivered a contact center panel enabling agents to manage customer calls and tickets more efficiently.
- Improved agent throughput by **20%** and reduced average handling time by **15%**.
- Integrated call metadata with task workflows to automate follow-ups and reduce manual handoffs.

OneTech Lite (Offline-first Mobile Solution)

2022 – Present

Backend Dev & Sync Architect – Flutter (offline), AWS

- Implemented an offline-capable mobile app with automatic sync to cloud services; improved usability in low-connectivity regions.
- Designed robust sync conflict resolution and background sync to preserve data integrity during intermittent connectivity.

Event Management System (Enterprise Feature)

2021 – 2022

Full Stack – React, Node.js, MongoDB

- Built an end-to-end event management module, improving operational efficiency for clients.
- Implemented reusable UI components and backend streaming events which reduced frontend dev time by **25%**.

e-Invoicing SaaS (UAE) – PEPPOL / FTA Integration

2025 – Present

Solution Architect – PEPPOL, Node.js, Python, AWS

- Architected and delivered a PEPPOL-compliant SaaS platform for digital invoice exchange integrated with UAE's FTA.
- Automated invoice validation, transmission, and error handling, reducing manual processing by **60%**.
- Implemented secure data exchange and logging to satisfy compliance and audit requirements with **multi-tenant database structure**.

LEADERSHIP & RECOGNITION

Team Leadership:

Managed 50+ developers across multiple product lines; set architecture standards and code review practices.

Awards:

Employee of the Year – iProgrammer Solutions Pvt. Ltd.

Knowledge Sharing:

Delivered internal workshops on **AWS Serverless design** and scalable microservices patterns.
